

## **Inno4Life Joins Systech's UniSolve™ Partner Program**

### ***Offers Integrated Serialization Equipment Solutions to the Global Pharma Industry***

Princeton, NJ & Breda, Netherlands (Tuesday, March 15, 2016) – [Systech International](#), a global leader in brand protection technologies, announces the addition of [Inno4Life](#), an internationally recognized Original Equipment Manufacturer in Life Science equipment solutions, to its [Unisolve™](#) partner program. As such, Inno4Life will now offer UniSolve serialization software as an integrated turnkey solution to the Pharma and Life Science markets.

The partnership is prompted by customer demand to meet looming deadlines. European governments are enacting complex regulations that will put substantial pressure on pharmaceutical manufacturers. In fact, serialization regulatory deadlines have either passed or are approaching in four of the top five pharmaceutical markets in the world with more being established each year.

Systech is a global leader in serialization, track-and-trace, authentication, and engagement.

The companies have a history of success working together to support the packaging and serialization needs of a variety of clients in the global biotech and pharmaceutical spaces. To assist these clients to rapidly respond to new regulatory deadlines, Inno4Life serialization and aggregation equipment is now available with pre-configured Systech's UniSolve serialization software.

Inno4Life will also be a 'resident partner' in Systech's training and demonstration facility at its European headquarters in Brussels. This allows Systech's regional clientele to participate in live training and active demonstrations showcasing UniSolve's seamless integration with Inno4Life's packaging hardware.

"The pharmaceutical industry is facing a tremendous challenge to quickly comply with the European Medicines Agency's (EMA) plans to implement packaging safety features as part of the Falsified Medicines Directive (Directive 2011/62/EU) (FMD), adopted in July of 2011," explains Manfred Voglmaier, senior director, Europe, Systech International.

"They need to ramp up now if they are to meet the requirement for serialization of licensed drug products which will be a legal requirement for companies in the EU starting in 2019."

"We're very pleased with this partnership. Inno4Life's in-depth knowledge of automated integration equipment in the pharmaceutical industry complements the position of Systech as a global market leader in serialization software systems," says Johan Klootwijk, managing director, Inno4Life.

**About UniSolve™**

Inno4Life is the preferred Systech partner in Europe as equipment integrator in the end-to-end deployment of serialization and aggregation solutions. The comprehensive UniSolve™ program integrates all hardware and software components required to ensure traceability throughout the supply chain. This track-and-trace solution surpasses common off-the-shelf solutions by consolidating all serialization systems and scenarios.

**About Systech International**

Systech is the global technology leader in product safety, and consumer and brand protection. Systech pioneered serialization and is defining the future of authentication. Trusted by 19 of the top 20 pharmaceutical companies, Systech unifies and optimizes enterprise serialization, track and trace, and authentication technologies to ensure regulatory compliance, mitigate risk, and drive efficiency and profitability. For 30 years, Systech's innovation has led best practices for key brands across the pharmaceutical, life science, food and beverage, and consumer packaged goods industries.

**About Inno4Life**

Inno4Life specializes in complex customer-specific engineering-to-order projects in the Life Science industries, namely the Pharmaceuticals (Human and Animal), Medical & Clinical Instrumentation and Food industries. Our knowledge is deeply rooted in the automated pharmaceutical packaging business. We have, therefore, the in-built expertise, discipline and the very specific know-how to help overcome the evolving challenges constantly faced by customers in highly regulated markets. Relying on many years of combined experience and skills in the management of large-scale projects internationally, we offer a complete range of solutions in the following areas: Equipment & Support, System Integration, System Optimization and independent Expert Advice. Visit [Inno4Life.com](http://Inno4Life.com) for additional information.
